

NAGARI INTEGRATED DAIRY FARMS LIMITED

Corporate Profile

HISTORY & BUSINESS

Nagari Integrated Dairy was established in 1982 as an integrated agricultural company specializing in the production of dairy, fresh farm produce and in meat processing and Dairies milling. Located at Gauta/Nike Road, Keffi, Nasarawa State, Nigeria, the Company operational area covers 1,200 hectares of land and is reputed as one of the of largest single integrated dairy farms in Africa. its business operations are in two main areas, namely, dairy farming and the production of yoghurt drinks.

Nigari operates a large-scale processing facility for the production of yoghurt, cheese and fresh milk. The production of yoghurt and fresh milk commenced in 2003 but had suspended for about 2 years in order to undertake the upgrade of its production facilities. The objective of the yoghurt processing was to produce varieties of unique tasty yoghurt drinks with a wide market acceptance in major cities via diverse distribution channels.

Nagari Yoghurt utilizes only the highest quality products from the best and most reputable suppliers in and outside the country. to ensure quality and consistency. This not only ensures Nagari of the finest yoghurt products available but also ensures its own reputation will be enhanced. to ensure quality and consistency. This not only ensures Nagari of the finest yoghurt products available but also ensures its own reputation will be enhanced.

Production and Process Control

The plant is automated and runs smoothly with minimum maintenance and manpower. The production process is constantly checked and controlled, ensuring that the parameters are in accord with set standards. Samples are taken at all stages of production (hourly) and an in-house analysis is carried out to test and ensure conformity with set standards.

Plant Maintenance

The Company has a team of in-house engineers and technicians equipped with the necessary skills and tools required for effective maintenance management carry out maintenance activities. The maintenance process consists of a series of daily factory scheduled maintenance activities are designed to strive for zero maintenance backlogs, controlling cost and reducing maintenance inventory.

Packaging

The finished products are packed into 500ml and 1 litre Tetra pack containers. Tetra packs provide enhanced convenience, portability, and shelf-stability. These aseptic packaging solutions ensure that yogurt drinks remain fresh without the need for refrigeration, addressing challenges posed by inadequate cold storage infrastructure in some regions. Tetra packs are well-suited for on-the-go consumption, catering to the fast-paced urban lifestyle of Nigerians. The tamper-proof and resealable nature of Tetra packs ensure product safety and minimizes wastage, appealing to both consumer preferences and sustainability considerations. This packaging format also enables brands to offer various portion sizes, enhancing choice and affordability. Use of Tetra packs enhances the Company's ability to extend the reach of yogurt drinks to diverse markets and also contribute to the growth of the sector by aligning with consumer demands for convenience, accessibility, and product integrity.

The Finished Products.

The following are pictures of the finished products.

Marketing & Distribution

The distribution of dairy products is a time-sensitive operation that requires careful planning and coordination. Dairy products, being perishable, need to be transported in refrigerated vehicles to maintain the cold chain from the processing plant to the retail outlet.

Key elements of the distribution process include:

- **Logistics and Transportation:** Efficient logistics are crucial for the timely delivery of dairy products. This includes route planning, fleet management, and real-time tracking to ensure products are delivered as quickly as possible.
- **Cold Chain Management:** Maintaining the right temperature throughout the transportation and storage process is vital to prevent spoilage and ensure the safety of dairy products.

The marketing strategies which are designed to attract and retain customers include

packaging,

promotions, and ensuring products are available in a variety of retail outlets. Distribution Plan is primarily based on direct delivery to bulk customers including supermarkets, stores and hotels. In this connection, the Company has established relationships with bulk purchasers and dealers in order to reach ensure widespread distribution of its products. It also participates regularly in local food festivals and farmers' market. The foregoing initiatives have contributed significantly in establishing its brand in the heart of major cities via supermarkets, stores, food trucks, street hawkers etc.

Supermarkets and stores provide a widespread and accessible distribution network for Nagari products. As major retail hubs, these establishments cater to rapid urbanization and evolving shopping preferences of Nigerian consumers. The supermarket and hypermarket environment complements the fast-paced lifestyles of urban Nigerians, offering a seamless shopping experience that aligns with their preferences for convenience and variety.

The marketing and distribution plan will be expanded to include the following additional initiatives:

- Establishing partnerships specialized food distributors including local fitness centres and health food stores
- Sampling events at designated grocery stores

Pricing Strategy:

The Company's product pricing policy reflects prevailing market circumstances and provides reasonable margin for the Company and its distribution partners.

The pricing strategy is hinged on two major bases:

- Differential pricing for certain volumes of bulk purchases
- Bulk purchase discounts for regular customers
- Special promotional pricing for new product launches

Research & Development

Integrated Dairy has invested in research and development, and in start-of the-art dairy farming technology. The Company has developed its own proprietary dairy farming expertise and methodologies. This has made it a benchmark for the efficient production of high-quality dairy products. Currently its yoghurt brand is highly sought after many supermarkets in the state and the Federal Capital, Abuja

As part of its strategy to reduce its environmental footprint, the Company adopts sustainable farming practices in its operations by managing waste effectively, using water responsibly, and reducing greenhouse gas emissions.
